### **eCysticFibrosis Review offers ACPE accredited programs through Postgraduate Institute for Medicine**

New York, NY (August 27, 2008) - DKBmed, LLC, has announced the ACPE accreditation of its Johns Hopkins eLiterature series, eCysticFibrosis Review, for pharmacists, pharmacy techs. Postgraduate Institute for Medicine is our accreditation partner. Clinicians can register for the series by visiting [www.eCysticFibrosisReview.org](http://www.eCysticFibrosisReview.org)

eCysticFibrosis Review was designed for clinicians who have made a commitment to staying current. Each month, eCysticFibrosis Review will evaluate emerging literature and present it in a topic-focused newsletter and podcast (audio recording) formats full of valuable takeaway points that can be immediately applied to clinical practice.

Premiering in May 2008, eCysticFibrosis Review began with Issues Related to Newborn Screening. International cystic fibrosis specialist, Philip M. Farrell, MD, from the University of Wisconsin, serves as guest author to provide his clinical insights to recently published scientific work for newborn screening. The July 2008 issue with guest author Joseph Pilewski, MD of the University of Pittsburgh Medical Center, focuses on the Key Issues in Lung Transplantation. The curriculum for eCysticFibrosis Review spans 12 months, through March 2009. To enhance their value as enduring clinical resources, some issues of eCysticFibrosis Review will include podcasts with supportive, complementary information on those focused topics. The podcasts and newsletters will be archived at eCysticFibrosis Review.org. The archives will be updated frequently and will be indexed by date, topic, and guest author.

Please visit [eCysticFibrosisReview.org](http://eCysticFibrosisReview.org) for topics, dates and registration information for this free resource. Because this service is designed to deliver late-breaking information it is a valuable resource for all disciplines providing care to patients with cystic fibrosis.

***About DKBmed***

eCysticFibrosis Review is a program launched by DKBmed, an integrated, non-accredited, continuing medical education company operated by an experienced team of medical education professionals and featuring the finest faculty in the country. The goal of DKBmed is to provide healthcare professionals with effective medical education to ensure optimal patient care — wherever and whenever time permits.

Working with accredited providers, DKBmed develops and distributes live, recorded, print, and Web-based educational programs. These programs are now accessible on the company's recently revamped Web site ([www.dkbmed.com](http://www.dkbmed.com)). DKBmed's programs reach over 30,000 clinicians specializing in a variety of areas, including neonatology, transplant infections, infectious disease, dermatology, macular degeneration, and pain management.

Information on the Postgraduate Institute for Medicine can be found at [www.pimed.com](http://www.pimed.com).
